The Tikrit Small Business Development Center was created with financial assistance from USAID and the American people

SEDO - SBDC / Tikrit

Who we are?

Sahara Economic Development Center (SEDO) was established in April 2008. Our organization focuses on developing the economic sector through providing business management trainings and other services, such as English and computer classes, to the local community, entrepreneurs and potential investors which will enable them to efficiently contribute to the growth of the city and surrounding area.

SEDO is considered among one of the most effective and qualified organizations in Tikrit. SEDO will be conducting economic studies on the business environment in Salahuddin, which would consequently aim at identifying business opportunities and market niches for potential investors in the province. SEDO established two sub offices in Beiji and Samarra.
